MOHAMMED AMMAR TANWAR

Front-End Engineer II

India (Open to Remote, Hybrid & On-site with Relocation | Global Overlap)
+91 8239019096 • ammar.tanwar.dev@gmail.com • ammar-tanwar

Summary

Front-End Engineer with 5+ years of experience engineering high-scale, accessible, and mission-critical web applications across multi-tenant enterprise platforms and data-driven systems. Specialized in TypeScript, React.js, and state management, with a track record of architecting composable UI architectures, building reusable enterprise design systems, and integrating complex APIs. Proven experience driving code quality, conducting rigorous code reviews, and mentoring engineers to raise the technical bar.

Technical Skills

Languages & Core: TypeScript, JavaScript (ES6+), HTML5, CSS3, WCAG 2.1 AA, WAI-ARIA

Frameworks & Architecture: React.js, Next.js, Redux Toolkit, Context API, Micro-frontends, Composable UI, Modular Architecture

Component Design & Libraries: Reusable Design Systems, Component Libraries, Design Tokens, Tailwind CSS, Material UI

Testing & Operational Excellence: Jest, React Testing Library, ESLint, Webpack, Vite, Git, CI/CD, Chrome DevTools

APIs & Distributed Integration: RESTful APIs, GraphQL, Microservices Integration, JSON Data Exchange, Postman

Education

Bachelor of Technology in Computer Science and Engineering 2017-2021
Rajasthan Technical University, Kota, Rajasthan

Experience

CXS Analytics Sdn Bhd

November 2024 - September 2026
(Remote - Malaysia/Global)

Software Developer (Frontend)

- **InsightAccess** (Enterprise SaaS HCM Platform):
  - Led frontend architecture and feature delivery for a multi-tenant Human Capital Management (HCM) platform deployed to enterprise clients, including publicly listed companies in the Philippines (EEI, Eight8Ate).
  - Architected modular, composable UI workflows and interactive dashboards using React and TypeScript, enabling configurable multi-tenant views and reducing UI technical debt across enterprise client deployments.
  - Engineered high-impact modules across Talent Acquisition and Job Management, actively contributing full-stack enhancements across React.js frontends and Laravel/REST API backends.
  - Engineered WCAG 2.1 AA compliant, reusable UI components and automated test suites via Jest and React Testing Library, eliminating regressions, accelerating cross-browser compatibility, and resolving complex production issues.

- **MyNext** (National HR Tech Initiative - TalentCorp Malaysia):
  - Developed and scaled client-facing web applications using React.js for the Company and University modules under Talent Corporation Malaysia (Ministry of Human Resources).
  - Engineered key features within the integrated Learning Management System (LMS) using PHP Laravel, supporting seamless cross-system data exchange.
  - Collaborated across distributed squads to deliver production releases, leveraging GitLab CI/CD pipelines, ESLint, and Webpack to automate build verification, linting, and zero-downtime deployments.

Learn Vista Private Limited (Learnbay) January 2022 - November 2024
Senior Web Developer Bengaluru, Karnataka

- Spearheaded front-end architecture and mentored a squad of 4 engineers in systems thinking, TypeScript standards, and testing best practices; conducted high-impact code reviews focused on long-term maintainability and engineering capability.
- Leveraged modern component architecture and rapid prototyping to build interactive student performance and tracking dashboards.
- Migrated legacy monolithic architecture to Next.js and React.js, boosting system scalability and page speed index across high-traffic learning platforms.
- Architected an enterprise-grade reusable component library and composable UI patterns consumed across 3 independent portals, standardizing accessibility and reducing sprint delivery cycles by 30%.
- Audited Core Web Vitals via Chrome DevTools, reducing client-side bundle size by 40% and ensuring sustained sub-second interaction metrics across high-traffic routes.

ABAL Solutions June 2020 - December 2021
Web Developer Remote

- Developed responsive, cross-browser compatible web interfaces using semantic HTML5, modern CSS3, and JavaScript, ensuring consistent performance across desktop and mobile devices.
- Implemented client-side asset optimization and aggressive browser caching strategies, reducing page latency by 30%.
- Collaborated directly with stakeholders to translate business requirements into clean, functional UI features with high user retention.

Projects

Learnbay Scalable Learning Suite

Websites*: learnbay.co, tutorial.learnbay.co, blog.learnbay.co*

- Architected high-performance learning portals (learnbay.co) with server-side rendering for optimal SEO and conversion.
- Reduced client-side resource consumption by 40% through targeted performance audits.

Tech Stack: Next.js, React.js, Node.js, Express, MongoDB

Techshah Platform

Website*: Techshah*

- Developed a responsive, performance-driven web platform achieving 95+ Core Web Vitals scores.
- Optimized client-side asset loading, route pre-fetching, and SEO metadata to maximize discoverability and engagement.

Tech Stack: React.js, Next.js, Tailwind CSS

Mandawa Design House

Website*: Mandawa Design House*

- Built a modern, visually rich e-commerce and showcase platform tailored for international B2B inquiries and custom orders.
- Integrated responsive UI layouts with Next.js and Tailwind CSS, maintaining sub-second load times across mobile viewports.

Tech Stack: Next.js, Tailwind CSS, Laravel, REST APIs
