Summary

Senior Frontend & Full-Stack Engineer with 5+ years of experience architecting and shipping scalable, high-throughput web applications across distributed global teams. Specialized in React.js, Next.js (App Router/SSR), TypeScript, and Node.js ecosystems. Proven track record of optimizing Core Web Vitals, reducing client bundle sizes by 40%, and delivering production features across cross-border remote environments.

Technical Skills

Frontend

• React.js • Next.js (App Router, SSR/SSG) • TypeScript • JavaScript (ES6+) • Tailwind CSS • HTML5/CSS3
• State Management (Context API, Redux Toolkit) • Bootstrap • WordPress

Backend & Databases

• Node.js • Express.js • RESTful APIs • PHP (Laravel) • MongoDB • MySQL

DevOps, Tools & Workflows

• Git • GitHub • GitLab • Docker • CI/CD • Postman • Vite • Webpack • Jira • Chrome DevTools • Agile/Scrum

Education

Bachelor of Technology in Computer Science and Engineering 2017-2021
Rajasthan Technical University Kota, Rajasthan

Experience

CXS Analytics Sdn. Bhd. November 2024 - Present
Senior Frontend Engineer (Remote - Malaysia/Global)

- **InsightAccess** (Enterprise SaaS HCM Platform):
  - Led frontend architecture and feature delivery for a multi-tenant Human Capital Management (HCM) platform deployed to enterprise clients, including publicly listed companies in the Philippines (EEI, Eight8Ate).
  - Engineered high-impact modules across Talent Acquisition and Job Management, actively contributing full-stack enhancements across React.js frontends and Laravel/REST API backends.
  - Partnered with cross-functional teams to eliminate rendering bottlenecks, boosting platform usability, maintainability, and data clarity across high-volume HR workflows.

- **MyNext** (National HR Tech Initiative - TalentCorp Malaysia):
  - Developed and scaled client-facing web applications using React.js for the Company and University modules under Talent Corporation Malaysia (Ministry of Human Resources).
  - Engineered key features within the integrated Learning Management System (LMS) using PHP Laravel, supporting seamless cross-system data exchange.
  - Collaborated asynchronously across distributed international squads to resolve Jira sprint tickets, deliver bug fixes, and deploy reliable production releases on schedule.

Learn Vista Private Limited (Learnbay) January 2022 - November 2024
Senior Web Developer Bengaluru, Karnataka

- Promoted from Web Developer to Senior Developer to lead frontend architecture and mentor a team of 4 engineers in clean code and testing standards.
- Migrated legacy monolithic architecture to Next.js and React.js, boosting system scalability and page speed index across high-traffic learning platforms.
- Conducted comprehensive Core Web Vitals audits via Chrome DevTools, reducing client-side bundle consumption by 40% and cutting latency across dynamic routes.
- Optimized landing pages, registration workflows, and SEO funnels, resulting in a 20% increase in organic traffic conversion and paid ad performance.
- Built and documented reusable design-system components, speeding up cross-team UI feature delivery cycles by 30%.

ABAL Solutions June 2020 - December 2021
Wordpress Developer Remote

- Designed and implemented websites from initial concept and site architecture to finished deliverables, and coordinated content creation, design, and periodic updates to maintain website relevance and performance.
- Worked with plugins (such as elementor, WPBackery, wpforms etc.) and themes to meet unique project needs, ensuring functionality and user-friendliness.
- Implemented aggressive caching and asset-loading optimizations, cutting page load latency by 30% and ensuring 100% cross-browser responsiveness.
- Collaborated directly with stakeholders to translate business requirements into clean, functional UI features with high user retention.

Projects

Learnbay Scalable Learning Suite

Websites *: learnbay.co, tutorial.learnbay.co, blog.learnbay.co*

- Architected high-performance learning portals (learnbay.co) with server-side rendering for optimal SEO and conversion.
- Reduced client-side resource consumption by 40% through targeted performance audits.

Tech Stack: Next.js, React.js, Node.js, Express, MongoDB

Techshah Platform

Website *: Techshah*

- Developed a responsive, performance-driven web platform achieving 95+ Core Web Vitals scores.
- Optimized client-side asset loading, route pre-fetching, and SEO metadata to maximize discoverability and engagement.

Tech Stack: React.js, Next.js, Tailwind CSS

Mandawa Design House

Website *: Mandawa Design House*

- Built a modern, visually rich e-commerce and showcase platform tailored for international B2B inquiries and custom orders.
- Integrated responsive UI layouts with Next.js and Tailwind CSS, maintaining sub-second load times across mobile viewports

Tech Stack: Next.js, Tailwind CSS, Laravel, REST APIs
